50X1-HUM

SUPPLEMENT TO
REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION 50X1-HUM

1. Previous production of 13.10° DIN color film at Agfa-Wolfen has been completely superseded by the production of 17/10° DIN color film. The speed designation of this film may eventually be either 17/10° DIN (as 18/10° DIN. Apparently no clear-cut decision has been reached as to the actual speed of the new film. The general sale of this new film to nonprofessional users will probably not be permitted until stocks of the old film have been sold out or materially reduced.
2. The planned production of 17/10° DIN (18/10° DIN) color film for 1955 is as follows:

35 mm. movie film:	189,000 square meters
35 mm. roll film:	<u>35,000</u> square meters for still cameras.
Total	224,000 square meters of 35 mm. film.
3. The actual allocation of the new film to consumers has not been determined. The principal allocations, however, are to:
 - a. DEFA
 - b. Export
 - c. Requirements for amateurs within East Germany.

DEFA will use only movie film; amateurs will receive only still film, whereas both types will probably be made available for export.
